

BIOGRAFIA

ROCÍO SÁNCHEZ-CARRIÓN

Rocío Sánchez-Carrión is MSc in Neuropsychology by the Universitat Autònoma de Barcelona and she is currently working as clinical neuropsychologist in the Institut de Neurorehabilitació Guttmann, in Barcelona.

She obtained her PhD on Neurosciences at the University of Barcelona investigating brain activation patterns in patients with diffuse traumatic brain injury and the changes observed following neuropsychological rehabilitation.

Her clinical work in the Institut de Neurorehabilitació Guttmann focuses on neuropsychological rehabilitation helping patients and families understand and manage cognitive, behavioral and emotional problems following acquired brain injury.

Professor in Neuropsychological Rehabilitation Master Degree, Universitat Autònoma de Barcelona.

She participates actively in the interdisciplinary team developing and coordinating clinical aspects of the Guttmann, NeuroPersonalTrainer®, a telehabilitation platform for treatment of cognitive functions and she participates in several national and international research projects. Her main research interest is focused on the efficacy of cognitive rehabilitation in acquired brain injury.

Job position: Clinical neuropsychologist at Institut de Neurorehabilitació Guttmann.
